4. Things To Keep In Mind During Your Dive \*- NEVER HOLD YOUR BREATH, breath evenly. Do Deepest dive of the day FIRST - Do the deepest PART of each dive first.

 Always leave the water with at least 500 lbs. of air pressure - Keep track of buddy and / or dive group at all times

- Ascend to the surface slowly - one foot per second, while

minutes, or longer as indicated by dive computer

Abort the dive if you are uncomfortable for any reason. If you must

Take a Safety Stop at fifteen feet from the surface for at least THREE

\*- MONITOR YOUR GAUGES REGULARLY

- Follow the Dive Plan

surface, do so with a buddy. Avoid touching anything

RELEASING air from the BC.

How to follow compass settings:

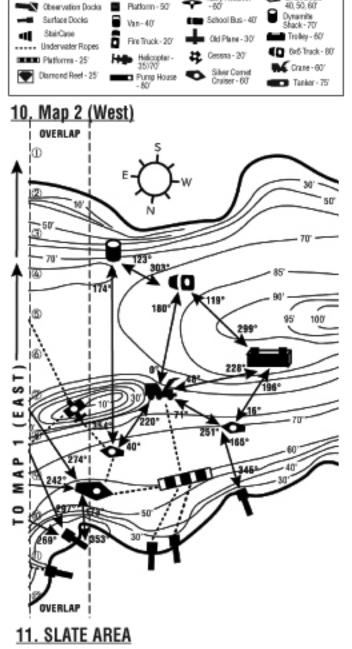

STOP

 The Compass Heading numbers (example: 66°) are located on the map. They are next to the arrow heads pointing in the

Hold the compass level, so that the needle moves freely. Turn the bezel (the turning dial), so that the compass heading (the direction you want to travel in - ex: 66°) is aligned with the DOT line (direction of travel line). - Position or

turn your body so the needle is pointing to the North or "N" (0°/360°) point on the bezel.

- Swim in the direction of the DOT line, always making sure that the needle is positioned pointing to the North, or the "N" on the bezel, at all times. If the needle strays from the NORTH position on the bezel, adjust your SWIMMING DIRECTION until the needle points again to the NORTH position on the bezel, and continue in the direction of the DOT Line. NEVER ADJUST THE BEZEL before you reach your destination. 7. Overview Map Map 1 East Map 2 West  $\rightarrow$
